

Aykos Antifreeze Protect -12 -40°C

Premixed long-term radiator protection fluid

Product description and properties

Aykos Antifreeze Protect -12 -40°C is a ready-to-use coolant based on ethylene glycol, developed for all vehicles that require the use of silicate-free products (e.g. Ford, GM and MAN). With an antifreeze concentrate content of at least 60%, it is suitable for all common engine types, including modern high-performance aluminium engines. It is also compatible with products from other brands (including VW G 11).

Aykos Antifreeze Protect -12 -40°C provides:

- Environmentally friendly due to the absence of nitrites, amines, phosphates and silicates
- Ensures year-round protection for the cooling system
- Provides reliable protection for all metallic materials in the cooling system

Application

Aykos Antifreeze Protect -12 -40°C was specially developed for motor vehicles for which silicate-free products are prescribed (e.g. Ford, GM and MAN). It is suitable for all engines, including modern high-performance aluminium engines, and offers year-round protection against frost, corrosion and overheating. Free from nitrites, amines, phosphates and silicates, it is also compatible with other brand products such as (VW G 11).
